Pendi Hydrocap

Pre-Emergent Weed Control Controlling the most difficult weeds with little to no staining. Encapsulated water based formulation of Pendimethalin. Reduced stinging potential. Handling flexibility with multiple tank-mix partners. Virtually no odor. Controls over 40 broadleaf weeds and grasses.

Avenger Organic Weed Killer

Post-Emergent Weed Control Avenger Organics Avenger Natural Weed Killer is a non-selective, post-emergence herbicide that quickly and effectively kills weeds, grasses and broadleaves without causing harm to the environment.

GlyPhoSel Pro 41% (41% Glyphosate w/15% Surfactant)

All Around Total Vegetation Herbicide Contains 41% glyphosate and 15% surfactant for fast and efficient kill, within 1-2 hours. Mixes easily. Low odor. Economical to use.

GlyPhoSel Pro Dry 75SG (75% Glyphosate w/Ammonium Sulfate)

Pre-Emergent Selective Herbicide Non-Selective, Fast-Acting systemic granular total vegetation weed killer. Starts working within hours, burning down and killing weeds and grasses. Can be used by homeowners, golf courses, landscapers, turf, ornamental and non-crop uses.

Grass Out Max (25.4% Clethodim)

Post-Emergent Grass Herbicide Labeled for most landscape, home and garden, ornamental, agricultural and non-crop uses. ONLY kills grasses and will not effect flowers, shrubs, broadleaf crops or other broadleaf plants. Effectively kills more than 50 different grasses.

Quinkill Max (18.92% Quinclorac)

Post-Emergent Selective Herbicide Selective control of Crabgrass and other unwanted grassy weeds in established residential lawns, landscapes, parks, athletic fields, sod farms and more. Labeled for Perennial Rye, Bermuda, Zoysia, Fescue and many more labeled grasses.

3 Way Max (47.3% 2,4D, 8.2% Meco Prop-P, 2.3% Dicamba)

T&O Broadleaf Herbicide Selective broadleaf weed control in turfgrasses, including use on sod farms. Controls over 50 different broadleaf weeds and is safe to use on all labeled grasses. The incorporation of 2,4D, Dicamba and Meco Prop-P gives a much wider range of broadleaf weed control than 2,4D alone.

ImidaPro 2 SC (21.4% Imidacloprid)

Multi Purpose Broad Spectrum Systemic Insecticide Can be used on lawns, in and around nurseries, athletic fields, greenhouses and golf courses. Kills/controls over 100 different kinds of insects by both contact and systemic action. Mixes easily. Low odor. Low use rate makes it economical.

Bifenthrin 7.9 % (7.9% Bifenthrin)

Contact and Systemic Insecticide Fully EPA label for agricultural, turf and ornamental, and professional pest control uses. Kills and controls over 125 different insects and pests. Formulated from the highest grade of technical Bifenthrin for maximum insect and pest control.

Complete Turf and Ornamental Fungicide

Provides preventative and curative activity on a broad spectrum of golf, residential, and commercial turf and ornamental plant diseases. Systemic and contact product. No resistance or immunity, even after multiple applications. Packaged in easy to read "confirmed tip & pour" bottles. Low use rate makes it economical to use.
